

The Lloyd's Register Group is an independent risk management organisation that helps to improve our client's quality, safety, environmental and business performance throughout the world. Our expertise and activities cover Energy (Oil, Gas, Chemicals, Power), Transportation (Rail, Shipping) and other asset-intensive industries. To strengthen our Energy business stream, we are looking for a:

**Surveyor (m/f) - southern & eastern area of Belgium**

Surveyor (m/f)

Namen - Luik - Tongeren

**FUNCTION**

As an engineer you will be responsible for the inspection, testing and (re)assessment of installations, component parts and/or products according to (inter)national rules/regulations, customer specifications and reporting the results obtained. When you have completed your training you will contact existing clients (constructors of pressure equipment, petrochemical industry) in order to obtain new assignments and provide information and advice concerning available products and services. Activities will be carried out in accordance with internal procedures, accreditation schemes, legislation and industry standards with current best practice being promoted.

**PROFILE**

- Technical degree (welding or process engineer is an advantage);
- At least 5 years experience in a relevant work environment;
- Knowledge of regulations and directives in the field of expertise and certification; statutory regulations for pressure equipment;
- Resident in the area Tongeren - Luik - Namen and willing to travel;
- Flexible and pro-active; good social skills;
- Able to work as a 'professional' independently and as a team player;
- Excellent communication; written and spoken command of English and French;
- Strong customer orientation and ability to set priorities;
- Eager to learn

**OFFER**

- An exciting working environment with challenges, responsibility and ownership;
- A personal development plan will be made to support you in realizing your long term goals;
- An attractive remuneration package will be negotiated for the right candidate.
